20. ABSTRACT (Continue on reverse side if necessary and identify by block number) This report contains a bibliographic listing of technical publications and papers presented by personnel of the US Army Natick Research & Development Command and its contractors for the period July 1975 through June 1976.		

## PREFACE

In January 1976, the US Army Natick Development Center was redesignated as the US Army Natick Research and Development Command.

*Report*  
This bibliography is a list of technical publications and papers by personnel of the US Army Natick Research and Development Command and its contractors for the period ~~July 1975~~ through June 1976. The arrangement is by organizational elements. In most instances where an article was prepared jointly by personnel of more than one laboratory, the citation is listed fully under the laboratory of the senior author with a "see" reference under the laboratory of the junior authors.

Reprints of journal articles, in some cases, are available from the individual authors. Copies of technical reports may be obtained from (1) The Defense Documentation Center, Cameron Station, Alexandria, Virginia 22314, or (2) the National Technical Information Service, Springfield, Virginia 22161. The "AD" number should be cited when ordering copies of reports. Those reports marked with an asterisk (\*) are not available for distribution outside the agencies of the US Government. Technical papers refer to presentations for which no printed copies exist.
